## **PREFACE**

These track records of United States Crop Production were assembled to serve as a ready reference for data users. The track records are comprised of National level statistics for the principal crops in NASS' estimating program.

The following data, as applicable, are presented for each of the crops:

Historic estimates of acreage, yield, production, price, and value.

Comparisons of preliminary and final planted and harvested acreage estimates.

Comparisons of production forecasts versus end-of-year and final production estimates.

Commodity estimates for 2008, 2009, 2010, 2011 are not considered final until the after the 2012 Census of Agriculture. Therefore, the columns titled "Percent of final" are a percent of the estimate published in the annual summary or the latest revision for 2008, 2009, 2010, and 2011.

The crop estimating program reports on farmers' planting intentions, estimates of acreage actually planted and expected to be harvested, and forecasts of yield and production during the growing season. After the crops have been harvested, estimates of harvested acreage, yield, and production are made.

Through the mid-year and other quarterly probability surveys, information is collected on acreage, yield, production, and grain stocks on farms. Surveys conducted between quarters are used to gather information on crop conditions and yields.

Due to the lapse in federal funding in October 2013, the National Agricultural Statistics Service (NASS) 2013 October *Crop Production* report was cancelled. As a result, no October 1 forecast for 2013 will be available in this report.

**This page intentionally left blank.**

## Field Crops Records for Acreage, Yield, Production, and Ending Stocks

Crop		Series began	Acres planted		Acres harvested	
			Acres	Year	Acres	Year
			(1,000 acres)		(1,000 acres)	
Barley <sup>1</sup> .....	low	1866	2,559	2011	754	1866
	high		19,686	1942	16,958	1942
Canola .....	low	1991	140	1992	112	1992
	high		1,765	2012	1,729	2012
Corn for grain <sup>1 2</sup> .....	low	1866	60,207	1983	30,017	1866
	high		113,024	1932	110,893	1917
Cotton, all <sup>3</sup> .....	low	1866	7,926	1983	6,973	1868
	high		45,968	1925	44,608	1926
Dry edible beans .....	low	1909	768	1909	764	1909
	high		2,599	1943	2,362	1943
Flaxseed <sup>4</sup> .....	low	1866	96	1996	92	1996
	high		6,182	1943	5,691	1943
Hay, all .....	low	1866	(NA)	(NA)	18,250	1866

<sup>1</sup> Planted acres beginning in 1963 include: corn, sorghum, oats, barley, Durum wheat, other spring wheat, rice, soybeans, flaxseed, peanuts, popcorn, cotton, dry beans, dry peas, potatoes, sweet potatoes, sugarbeets; also includes harvested acres for winter wheat, rye, hay tobacco, and sugarcane. Beginning in 1973, dry peas and popcorn were removed. Beginning in 1975, sunflower seed was added.

<sup>2</sup> Harvested acres include: corn, sorghum, oats, barley, wheat, rice, rye, soybeans, flaxseed, peanuts, popcorn, cotton, hay, dry beans, dry peas, potatoes, sweet potatoes, tobacco, sugarcane, and sugarbeets. Beginning in 1975 also includes sunflower seed.

<sup>1</sup> April 1976-1980, February 1982-1985.

<sup>2</sup> July prior to 1975.

<sup>3</sup> For March an additional survey done late April 1983 because of the PIK program. (10,648 planted acres - 102.2% of final)

## Barley Area Harvested with Comparisons – United States: 1965-2013

<sup>1</sup> Acreage in cultivation July 1 prior to 1958.

<sup>2</sup> Production figures are in 480-pound net weight bales from 1969 to date; prior to 1969, in 500-pound gross weight bales.

<sup>3</sup> Gross weight price, including bagging and ties, except that, beginning 1922, American Egyptian cotton is included at net weight; prior to 1908 prices are as of December 1. Season average price is derived.

<sup>4</sup> The 2013 estimates are preliminary and are subject to revision in the *Crop Production* report released May 2014. Price and value of production is preliminary, based on average price to January 1, 2014.

<sup>1</sup> Production includes 26,500,000 pounds that were not utilized due to the AAA program.

<sup>2</sup> 5,955,000 pounds harvested and shown under production were lost due to hurricane. Value is shown for only the quantity that was saved.

<sup>3</sup> Price and value exclude type 61 to avoid disclosure of individual operations.

<sup>4</sup> Price and value exclude type 41 to avoid disclosure of individual operations.

<sup>5</sup> Excludes estimated 2013 Connecticut Valley Shade-grown value of production and price for Connecticut and Massachusetts.

## Information Contacts

Listed below are the commodity statisticians in the Crops Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to [nass@nass.usda.gov](mailto:nass@nass.usda.gov)

Lance Honig, Chief, Crops Branch .....	(202) 720-2127
Anthony Prillaman, Head, Field Crops Section .....	(202) 720-2127
Cody Brokmeyer – Peanuts, Rice.....	(202) 720-7688
Brent Chittenden – Oats, Rye, Wheat .....	(202) 720-8068
Angie Considine – Cotton, Cotton Ginnings, Sorghum .....	(202) 720-5944
Tony Dahlman – Crop Weather, Barley, Hay .....	(202) 720-7621
Chris Hawthorn – Corn, Flaxseed, Proso Millet .....	(202) 720-9526
Travis Thorson – Soybeans, Sunflower, Other Oilseeds.....	(202) 720-7369
Jorge Garcia-Pratts, Head, Fruits, Vegetables and Special Crops Section.....	(202) 720-2127
Jorge Garcia-Pratts – Fresh and Processing Vegetables, Onions, Strawberries .....	(202) 720-2127
Jorge Garcia-Pratts – Floriculture, Maple Syrup, Nursery, Tree Nuts .....	(202) 720-2127
Fred Granja – Apples, Apricots, Cherries, Plums, Prunes, Tobacco .....	(202) 720-4288
LaKeya Jones – Citrus, Coffee, Grapes, Sugar Crops, Tropical Fruits.....	(202) 720-5412
Dave Losh – Hops .....	(360) 709-2400
Dan Norris – Austrian Winter Peas, Dry Edible Peas, Lentils, Mint, Mushrooms, Peaches, Pears, Wrinkled Seed Peas, Dry Beans .....	(202) 720-3250
Daphne Schauber – Berries, Cranberries, Potatoes, Sweet Potatoes .....	(202) 720-4285
